

Big Data Discovery Jump Start

Key Features

- + Smart, Automatic Data Profiling
- + Built-in Transformation Capabilities
- + Modern Visualizations
- + Fully Integrated with the Most Robust Hadoop Distributions on the Market
- + Explore and Profile all Datasets in the Hadoop Data Lake

Key Benefits

- + Be able to forecast and justify investment
- + Immediately know when not to proceed
- + Transform and enrich data on a massive scale to easily improve data for everyone
- + Spend time and resources on analytics and insight instead of data prep
- + Expand Big Data teams to include business analysts and drive collective discovery
- + Process data in place in Hadoop, substantially reducing data movement and management costs

Demystify and Explore Your Data

Oracle's answer to demystifying the modern data lake, Oracle Big Data Discovery (BDD) harnesses the distributed computing and storage power of Hadoop and adds an interactive layer through which users can easily explore all their data. Oracle BDD wraps data analysis, transformation, and discovery tools together into a single user interface, and it comes with advanced features like smart, automatic data profiling, built-in transformation capabilities, modern visualizations, and solid integration with Hadoop.

Let the Experts Provide a Window into True Discovery

Big Data Discovery Jump Start provides fast and trusted Oracle BDD installation and certification, allowing Oracle customers to quickly maximize the value of their Hadoop investment.

Edgewater Ranzal is especially equipped to help customers prove out potential use cases of BDD as well as architect and build out implementations of the product.

Jump Start Provides These Benefits to Maximize the Value of Your BDD Investment:

- + Expert Assessment and /or Installation of HDP
- + Production-Ready Certification
- + Installation, Certification, and Performance Checks
- + Technical Documentation
- + Fixed Cost
- + Time-to-Value

Assumptions

- + Single Node BDD
- + Up to 10 Data Nodes
- + No Kerberos Required
- + Customer has Completed a Pre-Installation Checklist

Big Data Discovery Jump Start

Managed Analytics Option

Edgewater Ranzal offers cost-effective post-BDD maintenance strategies in order to help maximize success

- + Production & Application Support
 - 24/7 Support
 - Rapid issue diagnosis/resolution
 - Expert management of Hadoop support cases
- + Monitoring & Performance
 - Automated alerting and reporting
 - Usage & performance statistics for any time period from hourly to monthly
 - Advanced troubleshooting & analysis (performance issues, data bottlenecks, root cause analysis) at each level
- + Platform Support
- + New Application Architecture & Advice
- + Application Upgrade Advisor
- + Usage Reporting & Proactive Analysis
- + Periodic Roadmap Planning

Ranzal Service Offerings

- + Profitability Project Initiation & Analysis Services
 - Partnership with Oracle to deliver “Profit-Focused Enterprise” ROI Service
 - Multi-Phase, Multi-Product Strategic Roadmaps & Visioning
 - Future State Process Definition
 - Costing Requirements Analysis & Proof of Concept Development
- + Full Life Cycle Application Delivery across multiple application types & verticals
- + Tuning, Optimization & Upgrades
- + Post Go Live & Managed Service Contracts

Ranzal Project Experience & Resource Capabilities

- + Over 20 Experienced Full Time Consultants across the Americas and EMEA
- + Thought leadership provided by a trained, trusted, and certified Oracle Partner
- + Premiere Oracle BDD installation and application experts
- + Long-standing relationship with Hadoop and our own team of Hadoop Certified Administrators and Developers
- + Close Relationships with Oracle Development – involved in initial Product Architecture
- + Edgewater Ranzal Exalytics Lab available for POCs, Project Jump Starts & Performance Benchmarking
