Hospitality

Products

Cloud - EDMCS
Cloud - FCCS
Cloud - PBCS
Cloud - CDM
Cloud - ARCS
On Prem - FDMEE

Legacy Platform

Non-Oracle

Multi-Product Enterprise Performance Management (EPM)

Customer Success Story

Baha Mar moved directly to Oracle EPM Cloud with an initial focus on Consolidation (Financial Consolidation and Close Cloud (FCCS)) and Planning/Budgeting (Planning and Budgeting Cloud Service (PBCS)) products. Due to similarities in reporting structures across the Planning and Consolidation groups, coupled with plans for future project initiatives, they inquired about Enterprise Data Management Cloud Service (EDMCS) for centralized master data maintenance. After an evaluation period, Oracle selected Baha Mar as one of three early adopters for EDMCS along with Edgewater Ranzal as the implementation partner.

Top Customer Objectives and Challenges

- New hotel/resort moving directly to Oracle EPM Cloud
- Define/rationalize reporting structures and ensure alignment across General Ledger and Oracle Cloud applications.
- Standardize and streamline metadata maintenance across multiple systems

Results

- Implemented EDMCS to manage key financial dimensions for FCCS and PBCS
- Established the foundation for future expansion of EDMCS (e.g. additional dimensionality, ERP integration)
- Leveraged other Oracle Cloud and On-Prem products to provide end-to-end integrated solution
