

The Oracle Analytics Cloud Solution

Faster Decisions in the Cloud

Thinking of going to the Cloud and not sure where to start? Let Ranzal help you with that first step. Deliver information that your executives and business users need anywhere, anytime, and much sooner than you think, with our Oracle Analytics Cloud (OAC) solution. Quickly set up a complete analytics Cloud solution containing dashboards and visualizations that allow you to get insights into key metrics to manage your business. You'll do it with the power of Oracle's Platform as a Service solution, reinforced with Edgewater Ranzal's Professional Services.

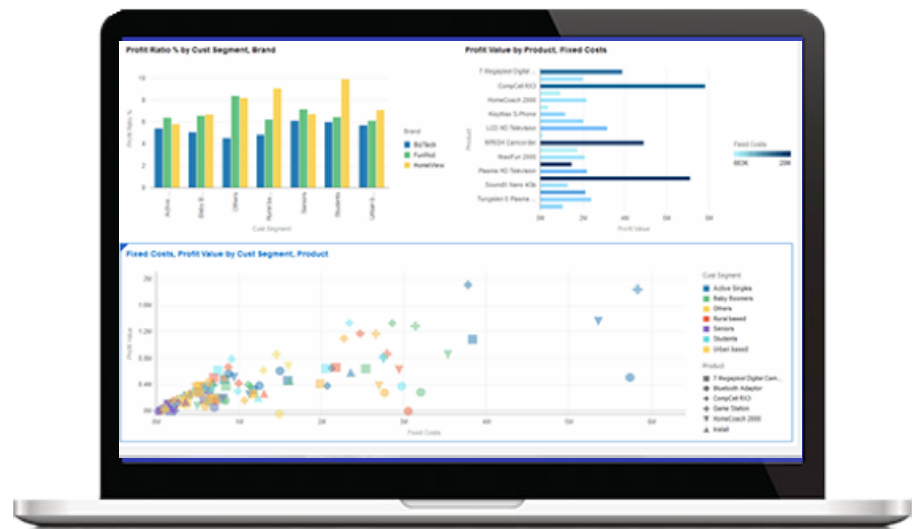

Dashboards & Visualizations

Access the insights into key metrics necessary in order to make complex decisions. Through intuitive, easily accessible dashboards, executives are empowered to make everyday business decisions. Through visualization projects, analysts uncover patterns and information that were previously hidden, and that dictate the strategic direction of your organization.

KEY BENEFITS

Edgewater Ranzal's OAC solution provides you with the following benefits:

- + A foundation for future development after just a few weeks with OAC instance set up and configured by Edgewater Ranzal
- + Combines dashboarding, reporting, data visualization, and OLAP design on a single platform
- + Ability to extend the solution to accommodate additional functions
- + Measure and present key metrics in interactive dashboards and dynamic visualizations accessible from anywhere
- + Reduced total cost of ownership and burden on IT through Oracle's Platform as a Service model
- + Maintain agility with flexible software licensing
- + Guarantee user adoption and satisfaction through iterative/phased approaches

About Oracle Analytics Cloud

Oracle Analytics Cloud is a single platform that empowers your entire organization to ask any question of any data in any environment on any device.

COMPLETE Meeting your needs with comprehensive capabilities, from self-service data discovery to powerful predictive analytics and enterprise-class reporting

CONNECTED Bringing the power of your data and analytics to every process, interaction, and decision

COLLABORATIVE Creating collective intelligence from people, places, and machines to power proactive analytics and change the way you work

CHOICE Putting you in charge of your data and your destiny with analytics at any scale, in any environment – Cloud, on-premises, or both

WHAT IS INCLUDED?

- + An Executive Dashboard for one subject area (e.g. Divisional, Functional, Global)
- + Role-based provisioning for up to 10 users
- + Single platform that combines dashboarding, reporting, data visualization, and OLAP design
- + Configuration of up to 20 Key Performance Indicators (KPIs)
- + Configuration of up to 5 dashboards and projects for information delivery
- + Design documentation outlining the application configuration
- + Documented system administration guide to manage the environment
- + Connections to 2 additional systems of your choice, on-premises or in the Cloud

What is the Process?

You provide us with the data in an Excel spreadsheet and we do the rest.

- In the first week, we will work with you to review the data, understand your metrics, and confirm the execution plan
- During the next four weeks of the development cycle, the following goals will be achieved:
 - Configuration of OAC instance, including role-based security
 - Creation of file upload mechanism to load the data into the Cloud via a defined format
 - Development of dashboards and visualizations
- The final two weeks will include User Acceptance Testing Support and the Pilot Rollout
