

Bringing Universal Health Services' Planning Process to the Cloud

Lower Total Cost of Ownership

Integrated Planning & Reporting

Process Optimization

UHS engaged with Edgewater Ranzal to move its legacy planning application from an on-premise solution into the PBCS platform. As part of its move to the Cloud, UHS also undertook business process re-engineering with Ranzal – leveraging Ranzal's Health Care Accelerators to re-envision how it plans for its facilities. With Ranzal's deep industry expertise, solutions were developed based on leading practices and quickly implemented for the business across UHS' 200+ locations.
